

Carte écoforestière

STRATIFICATION ÉCOFORESTIÈRE

Table with columns for Code, Description, Type de couverte, and other classification parameters.

Table for 'Exemple d'appellation' showing combinations of codes and their corresponding map labels.

TYPES DE COUVERT ET ESSENCES SELON LE PROGRAMME D'INVENTAIRE

Text describing cover types and species according to the inventory program.

Text describing tree types and species.

Table with columns for CODE, ESSENCES RÉVÉLÉES N° 1, ESSENCES RÉVÉLÉES N° 2, and ESSENCES RÉVÉLÉES N° 3.

Footnote explaining the codes and abbreviations used in the table.

INDICES DENSITÉ-HAUTEUR

Table showing density-height indices for various cover types.

Footnote regarding information on the density-height indices.

CLASSES D'ÂGE

Table defining age classes for forest stands based on different criteria.

PERTURBATIONS D'ORIGINE

Table defining the origin of disturbances in forest stands.

INTERVENTIONS PARCELLES

Table defining the types of interventions performed on forest parcels.

TERRAINS FORESTIERS IMPRODUCTIFS

Table defining unproductive forest lands based on slope classes.

CLASSES DE PENTE

Table defining slope classes and their corresponding taxonomic status.

CODE NON FORESTIER

Table defining codes for non-forest lands.

Legend for the map showing symbols for communication roads, obstacles, contour lines, forest types, and other features.

Metadata information including coordinates, datum, and scale of the map.

Source information and realization details, including the responsible organization and date.
